Masimo softFlow™

Nasal High Flow Therapy

The softFlow offers respiratory support through a soft nasal cannula, delivering a precise, consistent flow during both inspiration and expiration to enhance therapy benefits.

- > Adjustable flow rate from 10 to 60 L/min* in 0.5L/min steps to meet the inspiratory flow needs of each patient
- > Warmed humidification of air/oxygen to help provide therapy comfort and aid in mucus clearance^{1,2}
- > Ability to supplement with 0-60 L/min oxygen and up to 100% FiO₂ depending on patient requirements
- > Unique one-piece tubing and cannula design permits heater wire all the way to the cannula nares to reduce condensation

* The softFlow is FDA cleared for flow rates up to 50 L/min and in hospital and long-term care facilities. The 60 L/min version and the home use version are being made available in the US under the FDA Enforcement Policy for Ventilators and Accessories and Other Respiratory Devices During the COVID-19 Public Health Emergency.

Caution: Federal (USA) law restricts this device to sale by or on the order of a physician. See instructions for use for full prescribing information, including indications, contraindications, warnings, and precautions.

The Intelligent Analyzer.

Introducing GEM Premier 5000 with iQM2—for improved patient care.

GEM Premier 5000 blood gas testing system provides automated quality assurance with every whole-blood* sample. Now with next-generation Intelligent Quality Management (iQM2), featuring *new* IntraSpect™ technology, potential errors are detected not only before and after, but also *during* sample analysis, along with real-time correction and documentation. Plus, it's simple—just change the all-in-one GEM PAK once a month. So regardless of testing location or point-of-care operator, quality results and compliance are assured with every sample.

Real-time assurance and advanced simplicity. Now that's intelligent.

Introducing Servo-air®

Personalized ventilation meets high mobility

Servo-air — Intuitive. Powerful. Customizable.

It's here! Servo-air® is our turbine-driven ventilator with battery backup that lets you move freely, independent of wall gas or power outlets. As with other Servo ventilators, Servo-air provides optional personalized ventilation tools such as Servo Compass® for intuitive monitoring, Automode® for a smooth breathing transition, and High Flow therapy for improved work of breathing — all designed to help you perform on the go.

Chronic respiratory patients getting treatment **but not feeling better?**

Three great reasons to try the Philips InCourage system:

1 The Philips InCourage system triangle waveform technology **clears more mucus than** competing technology¹

Triangle waveform

2 RespirTech bronchiectasis patients reported **62% reduction in hospitalizations** and a **14% reduction in antibiotic use** one year after initiating Philips InCourage vest therapy²

Outcomes

3 “I was on antibiotics every month of the year for the last 40 years... **Since I’ve had the InCourage machine, I haven’t had to take antibiotics* in over a year...**”

-Marjorie M., CA

*Individual results may vary.

Patient results

For chronic respiratory patients with excess secretions, consider the Philips InCourage system (high-frequency chest wall oscillation) to help clear their airways. Since 2004, RespirTech has helped thousands of people like Marjorie—patients with bronchiectasis, COPD, cystic fibrosis, neuromotor conditions and more.

Breathe easier. We’re here to help.

NOXIVENT[®] Indication and Important Safety Information

Indication

Noxivent[®] is a vasodilator indicated to improve oxygenation and reduce the need for extracorporeal membrane oxygenation in term and near-term (>34 weeks gestation) neonates with hypoxic respiratory failure associated with clinical or echocardiographic evidence of pulmonary hypertension in conjunction with ventilatory support and other appropriate agents.

Important Safety Information

Contraindications

Noxivent is contraindicated in neonates dependent on right-to-left shunting of blood.

Warnings and Precautions

Rebound: Abrupt discontinuation of Noxivent may lead to worsening oxygenation and increasing pulmonary artery pressure.

Methemoglobinemia: Methemoglobin levels increase with the dose of Noxivent; it can take 8 hours or more before steadystate methemoglobin levels are attained. If methemoglobin levels do not resolve with decrease in dose or discontinuation of Noxivent, additional therapy may be warranted to treat methemoglobinemia.

Airway Injury from Nitrogen Dioxide: Monitor nitrogen dioxide (NO₂) levels. Nitrogen dioxide may cause airway inflammation and damage to lung tissue.

Heart Failure: In patients with pre-existing left ventricular dysfunction, Noxivent may increase pulmonary capillary wedge pressure leading to pulmonary edema.

Adverse Reactions

The most common adverse reaction of Noxivent is hypotension.

Drug Interactions

Nitric Oxide donor compounds may increase the risk of developing methemoglobinemia.

Administration

Use only with a calibrated, FDA-cleared NOxBOXi[®] Nitric Oxide Delivery System (NODS). Refer to the NODS labeling for needed information on training and technical support for users of this drug product with the NODS.

Please see the full Prescribing Information for additional important Noxivent[®] safety and risk information.

Can a Combivent® Respimat® inhaler be used inline?

...Yes!

RTC 26-C

Inline Aerosol Adapter

With the **RTC 26-C Inline Aerosol Adapter** you can now use a Combivent® Respimat® inhaler inline!

Choose Dale.

WHY

Choose the Dale Tracheostomy Tube Holder?

Because It Offers Benefits the Competition Just Can't Match

Moisture wicking lining

- Gentle, even on delicate skin.
- Helps keep neck dry.

Quick-fastening fastener tabs

- Easy to thread through flange of any size tracheostomy plate.
- Reduces the risk of accidental decannulation and need for reintubation.
- Allows for easy change of tube holder and trach dressings.

Adjustable neckband

- Adjusts to fit most patients, from pediatric to adult.
- Width reduces rolling or folding.
- Comfortable, padded neckband won't dig into skin.

Helps you provide care without compromise

- Dale products mean quality performance which ultimately saves time and cost
- Inferior products require more frequent replacement
- Fosters greater patient and clinician satisfaction
