BUYERS GUIDE 2012

Introducing the Softech® Plus Nasal Cannula

Soft. Safe. Superior.

Friction can contribute to pressure ulcer formation.¹
In laboratory tests Hudson RCI Softech Plus Nasal Cannulas demonstrated 30% less surface friction compared to alternative cannulas in its category.²

Thanks to a non-DEHP material blend that covers the entire bolo-style lariat, the Softech Plus Nasal Cannula is both soft and smooth, ensuring optimal patient comfort, neonates to adults.

¹ International review. Pressure ulcer prevention: pressure, shear, friction and microclimate in context. A consensus document. London: Wounds International, 2010.

Efficiency through innovation

Intelligent Ventilation

The HAMILTON-C3 is not available in all markets

Your ventilation solution provider from mobile to clinical ICU

By focusing on ventilation, HAMILTON MEDICAL has become specialized in Intelligent Ventilation. In intensive care, subacute care and even in emergency transport situations, you need more than high-end technical performance and we are perfectly positioned to respond to all your ventilation demands. You demand ventilation systems that deliver value and efficiency as well as clinical excellence, reducing clinical and management overhead as well as the overall cost of ownership.

You demand ventilators that deliver reliable data and easy-to-follow user guidance for better clinical decisions and a company that can consistently meet your demands.

HAMILTON MEDICAL's G5, C3, C2, T1 and C1 ventilation systems are easy to use, featuring award-winning, intuitive and powerful interfaces that are identical across all platforms. They can be introduced quickly into any complex critical care environment with minimum training.

Introducing a VHC you'll feel comfortable recommending.

Now you can offer patients a valved holding chamber (VHC) that delivers both comfort and performance. Philips' clear, antistatic OptiChamber Diamond is one of the smallest, full-function VHCs available, making it easy for anyone to use, virtually anywhere. Its low-resistance valves open freely, even under low pediatric pressures and flows. And a detachable LiteTouch mask with a soft-seal interface forms to the face with minimal pressure to comfortably deliver aerosol therapy and encourage compliance. Learn more at www.philips.com/optichamberdiamond.

Aeroneb® Solo
Nebulizer

We Love Lungs!

The Aeroneb® Solo is your trusted nebulizer for making your patients better.

We deliver more drug to the lungs than traditional MDI, Ultrasonic and Jet nebulizers. No added flow, no added pressure, no fuss. Find out why MDI, USN and Jet neb users are switching to the Aeroneb® Solo on www.aerogen.com
