A little can save a LOT.

The Passy-Muir® Valve

Studies have shown that the implementation of the Passy-Muir Valve in conjunction with a multidisciplinary tracheostomy team can result in early decannulation, decreased length of stay, and significantly reduced costs.*

Heliox Delivery – Streamlined
Ease of Use at the Point of Care

The Situation: Your patient is in the Emergency Room and the physician orders heliox. You have a cylinder available but can't find a regulator or a wrench. The patient's therapy is delayed, and you lose critical time looking for everything you need. Timely patient care hangs in the balance.

The Solution: Now you can help avoid these delays by selecting Vapotherm’s Precision Flow-Heliox unit along with Praxair’s new Medipure-LC™ Dual-Cylinder Cart and Medipure Heliox all-in-one cylinders. It’s a ready-integrated, portable solution for immediate use at bedside.

For more information, call 1-800-PRAXAIR.
GET THE MOST FROM YOUR OXYGEN MASK WITH THE HI-OX

When treating or transporting patients requiring high-flow or high FiO2 oxygen rates, the Hi-Ox mask uses new technology with sequential dilution to deliver greater than 80% oxygen at a mere 8 LPM – even with a transport cylinder. By taking away the usual holes in the mask, adding a second strap to ensure a better seal, and changing the delivery with three low resistance valves, higher concentrations of oxygen can be administered at lower flow rates. The sequential dilution design made possible with the low resistance valves enables high FiO2s to be delivered, even when peak flows are high.

- **FiO2**: Able to deliver higher FiO2s than a regular non-rebreather mask and simultaneously deliver aerosols
- **Economical**: Provides therapeutic benefit of Heliox while lowering cost; lower flow rates mean less gas usage
- **Therapeutic**: Lower flows allow the Hospice patient to return home sooner with the same high concentration delivery as in the hospital
- **Transporting**: Reduce the risk of hypoxia during transport by getting the most from standard cylinders – deliver high concentrations at lower liters per minute

The right choice.

Use of the AnchorFast oral endotracheal tube fastener may be associated with a statistically significant and financially important reduction in average costs and length of stay for ventilated patients.* Its unique features combine to help prevent the formation of lip ulcers and ease access for oral care.

Clear the Way for Better Outcomes

Every day, around the world, we enhance outcomes for our patients and their caregivers.

The Vest® Airway Clearance System
Available for Home Care and Acute Care

The Vest® Airway Clearance System provides safe, easy-to-use and effective therapy that can eliminate the need for patient repositioning and reduce the time spent delivering therapy.

The MetaNeb® System
Available for Acute Care

The MetaNeb® System is indicated for lung expansion therapy, the mobilization of secretions, and the treatment and prevention of pulmonary atelectasis. The system is very simple and easy to use.

To order today, call 800-426-4224, option #3, or contact your local sales representative.
When caring for critically ill patients, seconds save lives. So does confidence in diagnostic results. Even the flow of information through the hospital can have a decisive impact on a patient’s condition.

That’s why Siemens offers blood gas and point-of-care connectivity solutions backed by a team of people who know the challenges you face. And are committed to helping you meet them.

It’s why we’re constantly innovating to deliver products that meet your evolving needs. Products like the complete RAPIDSystems portfolio, instruments which deliver rapid, accurate results in the lab, the ICU, the operating room, or any point-of-care environment.

It’s why we’ve developed the RAPIDComm* Data Management System that helps you facilitate compliance, improve risk management and access results anywhere in your hospital. All while integrating seamlessly with your LIS/HIS and encouraging the workflow you need to operate more effectively and efficiently.

It’s why we back it all up with our Customer Care program, which includes prompt on-site service and ongoing operator training and education, and Siemens Personalized Education Plan (PEP)*, the industry’s first virtual competency-based learning tool.

Come see why critical care providers around the world trust Siemens as their partner of choice. Visit usa.siemens.com/partnerofchoice

*PEP patent pending. Not all product offerings are available in all countries.

To learn more about F&P Neopuff Infant T-Piece Resuscitation with Optimal Humidity please contact your local Fisher & Paykel Healthcare representative.

The delivery of heated and humidified gas during resuscitation has been found to reduce postnatal decrease in temperature and the incidence of hypothermia. (Te Pas et al. 2010)

Neopuff™ is the only T-Piece Resuscitator to provide a Humidified T-Piece Circuit option that provides Optimal Humidity during resuscitation.
